# Canadian Studies In The New Millennium

## Synopsis

The field of Canadian Studies is a growing discipline, particularly in the United States. This introductory text offers a thorough and accessible approach to Canadian Studies through comparative analyses of Canada and the United States, their histories, geographies, political systems, economies, and cultures. Among the topics addressed are ways in which Canadian national development has been influenced by the U.S., the role of geography in shaping the country's evolution, and the persistent question of Canada's French-speaking minority, which has been an important and divisive issue since the 1500s. Canadian Studies in the New Millennium is an excellent introduction to Canadian Studies, with chapters written by leading scholars and educators in the field. At a time in which there is a growing mutual dependence between the U.S. and Canada for security, trade, and investment, this text is an ideal tool for understanding the close relationship between the two countries, their shared experiences, and their differing views. Canadian Studies in the New Millennium will be of significant value to students, educators, and practitioners.

Patrick James is Dornsife Dean's Professor of International Relations in the School of International Studies at the University of Southern California. Mark Kasoff is an emeritus professor in the Department of Economics and former director of the Canadian Studies Centre at Bowling Green State University.

This is probably one of the best books on Canadian history. I was particularly interested in the

section on the American Revolution, a.k.a. War of Independence, as seen through Canadian eyes. Chapter 5 on Canadian culture including pop culture led me to a wealth of YouTubes on the Internet. At the end of each chapter are citations for further information--and they are very good.

Worked for class.

needed this for a canadian studies class, better off borrowing it from the library so boring, but has good information. just very boring.
