Beekeeping: Getting Your Bees Through The Winter

Synopsis

Certified Master Beekeeper, David Burns, has written a short and compact guide on one of our most pressing problems in beekeeping today, getting honey bees to survive the winter. Written so that even a beginner can understand, David has thoroughly researched this subject, breaking it down in understandable terms for both the new or experienced beekeeper. This book was compiled from his very popular Getting Your Bees Through The Winter course that he offers every fall at the training center at Long Lane Honey Bee Farms. This book goes into the details of how to prepare your hive for winter, addressing such subjects as when and how to feed honey bees, the pros and cons of winter wrapping hives, reducing the spread of honey bee viruses, increasing young bee populations in the fall, testing and controlling varroa mites, wind breaks, spring and winter feeding solutions and more.

Customer Reviews

Excellent. I learned a lot. Rather, I re-learned things in a sensible package. Fall care and feeding lesson was particularly well done. Write more tutorials please.

Thank you. I do have couple of questions. Do I stay with a screen bottom all winter? If so does the cut out in the winter-bee-kind cause a cold draft?

David is THE BEST when it comes to honey Bees. He's honest, extremely well educated on the Honey Bee. Check out his website at [...]. Very interesting David and his wonderful wife Sherry

With mounds of information available about beekeeping, this concise and accurate explanation on over-wintering bees is exactly what beekeepers are looking for. Excellent!! Thank you David Burns.

Very good information for a beginning bee keeper. How to winterize your hives. What to look for and how to treat.

Lessons from experienced are worth the time and money that can be passed on to the rest of us folk.

Very well done and informative

As advertised, enjoyed the info about bee behavior in the winter.
