Plastic Reason: An Anthropology Of Brain Science In Embryogenetic Terms

Synopsis

Throughout the twentieth century, neuronal researchers knew the adult human brain to be a thoroughly fixed and immutable cellular structure, devoid of any developmental potential. *Plastic Reason* is a study of the efforts of a few Parisian neurobiologists to overturn this rigid conception of the central nervous system by showing that basic embryogenetic processes—most spectacularly the emergence of new cellular tissue in the form of new neurons, axons, dendrites, and synapses—continue in the mature brain. Furthermore, these researchers sought to demonstrate that the new tissues are still unspecific and hence literally plastic, and that this cellular plasticity is constitutive of the possibility of the human. *Plastic Reason*, grounded in years of fieldwork and historical research, is an anthropologist's account of what has arguably been one of the most sweeping events in the history of brain research—the highly contested effort to consider the adult brain in embryogenetic terms. A careful analysis of the disproving of an established truth, it reveals the turmoil that such a disruption brings about and the emergence of new possibilities of thinking and knowing.

Book Information

Paperback: 352 pages

Publisher: University of California Press; Reprint edition (May 3, 2016)

Language: English

ISBN-10: 0520288130

ISBN-13: 978-0520288133

Product Dimensions: 6 x 0.8 x 9 inches

Shipping Weight: 12.8 ounces (View shipping rates and policies)

Customer Reviews

“*Plastic Reason*” deftly tracks how the notion of “neuroplasticity” gathered persuasive force among a community of neuroscientists in France. Conducting and composing his ethnography through a series of conversational encounters with brain researchers, Tobias Rees elegantly illustrates how science is made in rhetoric, debate, and practice. In accounts of neural plasticity, he argues, novel notions

of the human nature as unfixed, mobile, and open may be emerging. Stefan Helmreich, Professor of Anthropology, MIT

Tobias Rees is Associate Professor of Anthropology with a dual appointment in the Department of Social Studies of Medicine at McGill University.
