Botulinum Toxin In Aesthetic Medicine

Synopsis

Written by two renowned experts, this book surveys the use of botulinum toxin A in aesthetic medicine, including patient selection and evaluation, as well as rules and requirements. The book provides hands-on information for common indications, such as forehead and glabella, lateral brow lift, crow's feet and lower eyelid, bunny lines and marionette lines, nose and nasolabial folds, cheeks and "gummy smile," upper and lower lip, and the chin and neck. A section with tips and tricks makes this book an invaluable resource for the practicing dermatologist, plastic surgeons and all other physicians interested in the field of aesthetic medicine.

Customer Reviews

From the reviews: "This is an excellent resource for learning how to inject Botox. Even if you are a seasoned injector, I am sure you will discover tips to improve your technique. The audience includes any physicians who use Botox in their practice. The book specifically focuses on cosmetic use of Botox, so plastic surgeons and dermatologists would be the majority of physicians interested in reading it. I highly recommend it. This is definitely one of the better written books on the subject." (Patricia Wong, Doody's Review Service, June, 2008)

Good masterpiece on aesthetics. Plenty of pictures. Better would be including dvd or streaming techniques

Great!

Nothing wrong with the content - a very good book. The Kindle layout, however, is poor - photo's do not show on the same page as their description. Very clumsy.
