Dennis Bokovoy is a tour leader for Creation Encounter Ministries, John Hergenrather is Vice President of the Design Science Association, Mike Oard is a popular speaker and a retired

meteorologist from the National Weather Service, and Tom Vail guides tours through the Grand Canyon with Canyon Ministries.

This nicely bound book contains high quality imagery and detailed descriptions of the various plants, animals, geothermal features, and "wonders" of Yellowstone National Park. It's written from a Biblical worldview and gives glory where glory is due...a refreshing and much appreciated perspective.

This is a must for Yellowstone trip. We have 3 kids . We are reading it together each night. We are all learning so much! THanks so much for writing a great book!

we took this on our road trip, referred to it frequently, read it while we were driving often and it was a great resource for our 3 young kids and for us to learn. Thank you for the great book!

These guides proved a great resource for planning our National Park Trips and for understanding the significance of the Parks.

This was a gift for a friend and she said it was a great resource. It was used on vacation everyday!

This is an EXCELLENT resource! Great evidence from a creationist perspective, beautiful pictures, and lots of valuable information. We used this book a lot on our recent trip to Yellowstone.

As frequent visitors to Yellowstone and the Grand Tetons, we are always drawn to books about these two parks. We have accumulated many books over the years on these areas, but have found that this book is without a doubt, one of the best we have ever read. It is filled with concise information and beautiful pictures along with a biblical perspective. Just a beautiful, well-planned and executed guide to a fascinating part of our country. If you have ever been to either of these two national parks or are planning a visit, this book is one to own.

Excellent and refreshing guide to Yellowstone with clear indications of the best things to see in each region. It also gives interesting geological facts untrammelled by the philosophy of the evolutionary 'millions of years' viewpoint which so often blurs the difference between fact and fiction in other guides. So much of Yellowstone speaks of catastrophic origin and its very instability also speaks of

a catastrophic future. I recommend also the authors' other book on the Grand Canyon.
