Customer Reviews

Well written. I practically had no idea what was SEO, well I did think it had something to do with improving site ranking, but I didn't really have a 'good' or in depth understanding. From the intro of this book, I was hooked. What I mean is, now I really understand what this whole SEO thing is. The intro has been shortened (as mentioned in the book) to give a brief but also understandable definition of the terms and procedures in SEO. Such as -Hats - black, white greyOff page and On page optimizationPlus there are a lot of details on how to 'improve' various aspects of the website to get maximum SEO, social media, writing content etc. Then again, there is also a bad side to this, i.e. there is always a chance that the optimization for our website can fail due to certain reasons (which are defined clearly here)

This is a solid resource on SEO optimization!! I did a lot of research before finally settling on this book and It's thoroughly researched and well put together and the author makes complicated concepts easy to understand and He also touches on advanced tactics so experienced readers will walk away with at least a handful of new tactics and does this while making it fun, it feels like you have a good friend explaining the whole process and I've seen lots of businesses do well with SEO and I've seen lots of businesses struggle because they don't understand SEO and neither does

their SEO guy, so I think it's important to get the right knowledge and don't let this book get into the hands of your competitors so buy this book and grow your business to the next level.

As a business owner myself, I find this book really useful and the tips that are discussed here are very helpful. High recommended!

If you have chosen to write complete articles with keywords in then you can write these yourself or you could ask a member of your team to write something for you. Many companies actually find it easy to sub-contract the writing; there are plenty of fireclac wricrs who e prod goo uality content. Simply provide them with the guidelines and leave them to produce the required work.
