Grade Level: Kindergarten - 5

Customer Reviews

"Rhyming verse and appealing cartoon illustrations capture Grandin's spirit while providing an exciting, informative look at her remarkable life. Invaluable back matter contains a letter from Temple, fun facts, a time line accompanied by family photographs, and an insightful biography....this is the first volume in a promising new series introducing readers to remarkable women in the sciences." --School Library Journal "Fans of Andrea Beaty's Rosie Revere, Engineer (2013), or anyone who has struggled over feeling different, will appreciate this approachable biography of a inspiring scientist." -- Booklist "The author speaks directly and inclusively...this is an effective, age-appropriate introduction to a remarkable person." -- Kirkus Reviews "I'm really digging this new picture book bio series, Amazing Scientists! Lower word count, rhyming text, and sweet illustrations make them accessible to even the youngest reader/listener. More importantly, they profile still living women scientists & doctors who persevered against the odds, pursued their

passions, and became leaders in their fields." -- Kathleen Carey, Bookseller at Book House of Stuyvesant Plaza
"Think of this as a real-life Rosie Revere Engineer or Ada Twist Scientist! Refreshing to see a kids' picture book biography about someone I hadn't known previously." -- Tegan Tigani, Children's Book Seller at Queen Anne Bookstore

JULIA FINLEY MOSCA is a copywriter and former journalist who spent more than a decade in Hollywood crafting messages for money. After working with such recognizable brands as Entertainment Tonight, Yahoo!, American Greetings, and JibJab, she landed her most rewarding job yet—mom to one ferociously curious and spunky little girl. The Amazing Scientists series marks Mosca's debut into the magical world of children's books. DANIEL RIELEY is a British freelance illustrator based in Lisbon. After studying at The Arts Institute Bournemouth, taking an epic backpacking adventure in Australia, and working 3 years in London, he decided to take off to sunny Portugal. For the last 2 years, Daniel has been working on several illustration projects in advertising, print, card design, and children's picture books. When Daniel is not drawing you can probably find him trying to catch waves, taking photos with old cameras, or playing his newly discovered sport Padel.

My daughter is 4 and enjoys the rhymes and pictures. I enjoy being about to expose her to true peoples stories of different ways of learning and to show how being inclusive makes a positive impact on everyone. This books subject matter is going to grow with her as there is a biography timeline of Temple and can spark further interest in studying her life and the life of others who make an impact on society and the world without wearing a cape.

This book is brilliantly written! I love reading a book to my 4 year old daughter that gives her a real person she can look up to. It's so important to me, especially being the mother to 2 daughters that she learns that she can accomplish anything that she sets her mind to do, no matter what the obstacles are or what people tell her. The illustrations are so fun and the way the book reads and the rhyming patterns of how it is written, keeps my daughter engaged while I'm reading. I can't wait to follow this series and see what amazing woman the author writes about next!

I am so excited about this series of books. What a great opportunity for young minds to look into the real life stories of Sheroes. I can't wait to share these books with others. Wonderfully written and illustrated

Amazing book. Well written. Kids and adults alike will learn something new and will be entertained. I especially like that at the end of the book there is quite a bit of material on Temple Grandin.

A beautiful book with a wonderful message

We love this book!! This year in our homeschool we are learning about different important scientists. This book is both captivating and perfectly written for both my preschool and elementary aged kiddos! I love the fantastic rhyming story of Temple Grandin, and the fun illustrations. We learned so much from it! I especially loved the letter from Dr. Grandin, the fun facts, the timeline, and the extra little biography at the end. This book is perfect to incorporate in unit studies too! We will be using it as a component to our unit study on farm animals this year. I can't wait to see all of the other titles in this series!

As a home school teacher, I was delighted to obtain a copy in advance as it's a great resource for a unit study, especially for young girls. You could spend each day of the week with your daughter reading Temple's story, another day discussing the success of her overcoming incredible obstacles. The next day reviewing her contemporary timeline, and then write a letter to her thanking her for being such an inspiration. Lastly, you and your daughter or granddaughter could check out some more books about her at the library or another inspiring female. To wrap up, grab some popcorn and watch a video recommended at the end of the book. My take away from reading this lovely story is seeing a woman transform from all of her shortcomings to revealing an incredible gift of innovation and use it for good across the country. I would highly recommend picking up a copy of this The Girl Who Thought in Pictures as you and your girls will be encouraged, enlightened and empowered while reading this delightful story.

For any child who has ever felt like they didn't fit in, Temple Grandin is a name to know. Temple was diagnosed with Autism when she was young and this book shares her story from birth to present. I love the straightforward honesty with which her story is presented. The rhyming text adds a bounce and poetry to her story, but her childhood is not glossed over and her difficulties never ignored. The balance of struggles and successes helps to emphasize her strength and perseverance. Now a bestselling author, scientist and advocate, Temple shows little kids everywhere that they are

"Different, not less."
