ABC Universe (AMNH ABC Board Books)

Synopsis

From an astronaut in space to Voyager, yellow dwarf, and zenith, this ABC board book opens up the entire universe to children! Created in tandem with the American Museum of Natural History, it takes kids on a photographic journey through comets, flares, and planets like Jupiter, and introduces them to black holes, supernovas, telescopes, and more. Perfect for the youngest astronomers.

Grade Level: Preschool - Kindergarten

Customer Reviews

The American Museum of Natural History in New York City is one of the largest and most respected museums in the world. Since the Museum was founded in 1869, its collections have grown to include more than 32 million specimens and artifacts relating to the natural world and human cultures. The Museum showcases its collections in the exhibit halls and, behind the scenes, more than 200 scientists carry out cutting-edge research. It is also home to the Hayden Planetarium, which enjoys a proud legacy that has blended scientific scholarship with innovative public outreach for much of the past century. Approximately five million people from around the world visit the Museum each year. Plan a trip to the Museum, home of the world's largest collection of dinosaur fossils, or visit online at amnh.org.

Fun to read with great pictures. Informative.

If you want your child to have a career, then put down that you tube video and read this book. It's great for space and planet lovers (our child is obsessed).

Great book! Pictures are awesome and my son loves it

My 2.5yo son LOVES this book!

This book has tons of great facts, descriptions and pictures in it. I do have to say that when it came in, the edges around the cover and pages were pretty beat up, so I am not happy with its condition.

The kids in our daycare really enjoyed this one.

My two year adores this book. She loves Miles From Tomorrowland on Disney Jr and she carries this around calling it her Miles book. I love the educational value of it. A space term for each big bold letter. We've read it many many times. Even my five year old loves it.

My sons favorite book! He loves the bright colors!
