Age Range: 9 - 12 years

Grade Level: 4 - 7

Customer Reviews

Gr 3-7 • Journey the continents and countries with this vibrant reference that offers games and country data in addition to maps. Opening material includes a section on how to use the book and the maps featured. Most countries are covered on a whole spread (very small nations such as Malta and Vatican City have only one page), and the entries are arranged by continent and then region. An overview paragraph and map are included for each country, and entries for larger nations include a list of five things to do while there; three attractions; essential facts; and the national bird, flower, and mammal. "Digital traveler!" sections encourage research on National Geographic's site. When looking at this feature for Peru, for example, readers will find images of animals, such as guanacos, vicunas, alpacas, and llamas, and are then invited to reflect upon

similarities and differences from animals in their own area. This atlas is bursting with colorful and catchy photographs, images, and fact boxes. It is ideal for students who want to learn more about the world for their own knowledge and is also a great supplement to geography projects or travel planning. —Beth McGuire, Hempfield Area School District --This text refers to the Library Binding edition.

NATIONAL GEOGRAPHIC KIDS inspires young adventurers to explore the world through award-winning magazines, books, website, apps, games, toys, television series and events and is the only kids brand with a world-class scientific organization at its core.

Our 8 year old grandson absolutely loves this book, as he is a little "geography" nut. Very good for families who watch The Amazing Race together, wonderful maps with easy narrative for kids.

Excellent teaching resource! The product came as expected & has been useful while teaching students about geography standards.

The best book I found anywhere that helps kids and parents join together to explore the world together. Great job!

If I could give this book more than 5 stars, I would do so happily! We are a homeschooling family who have found this book amazingly helpful and fun to read. We are going through World Geography country by country and this book is informative, bright, colorful, and engaging!

Using as part of geography for elementary ages. Great resource.

My kids (5yo and 7yo boys) always enjoy the Nat Geo books. The books are large with great pictures. I would recommend to anyone.

great book- good reference for school and state bees. Too easy for national

We checked this book out from the library first, but loved it so much that we had to own it! LOTS of countries covered in the book. Love the pictures!
