Drug-Induced Ocular Side Effects: Clinical Ocular Toxicology, 7e

Synopsis

Ideal for ophthalmologists, optometrists and busy clinicians, *Drug-Induced Ocular Side Effects* provides the clinically relevant information you need to diagnose and manage chemical and drug-related ocular problems. An easily accessible format, meticulous revisions and comprehensive coverage of all drugs—generic and trade names, primary uses, ocular and systemic side effects, and clinical significance make this best-selling resource the ideal reference for quick, on-the-spot consultation. Manage any challenge in ocular toxicology with extensive coverage of principles of therapy; ocular drug delivery; methods to evaluate drug-induced visual side effects; and the role of electrophysiology and psychophysics. Benefit from the masterful guidance and global perspective of world authorities in the field who provide need-to-know information on all aspects of ocular toxicology—all in one concise reference. Confer with the WHO classification system to determine whether a particular side effect is certain, probable, or likely to occur.
